Many splats come with a way to avoid Aging to a degree. Changelings, Werewolves and Beasts with high Supernatural Tolerance are longer lived. By all means, have Magneto be an Elemental Changeling or the like (albeit that does clash abit with the 'Giving up your Ego' Fluff).

I like Daredevil as an Eshmaki Nemesis (who obviously has Relentless Hunter to keep up with this ridiculous Lifestyle, and Mimir's Wisdom to tell when people lie. Maybe something like Shadowed Soul, too.), but I also like to think of Kingpin as an Anakim Tyrant (with Limb from Limb reflecting his brutal blows and Alien Allure to explain his charisma). You could even make Power Man into an Anakim reluctant to feed his Hunger of Punishment (not the best fit, but workable, with Cyclopean Strength and Unbreakable, possibly Relentless Hunter). Hell, even The Immortal Iron Fist could be fluffed into being a Beast (Makara Nemesis, punishing all those trying to enter K'un Lun) who does not adhere to his Feeding Preference, a Dragon for a Horror and Limb from Limb Satiety Expenditure being his famous glowing fist, as well as Titanic Blow at the end of Season one. But then, I am biased like that.
I like Spiderman as a Skitterskulk.
Magik is obviously a Mastigos with high Space and some Mind, maybe some Spirits.
I would like to see Collossus, but what would he be?

There was a X-Men Microtemplate in the works, to represent stuff like the Wolverine.

Any ideas for Uratha or Sin-Eaters?

Besides the incredibly low-hanging fruit of Wolverine and Sabertooth? Hulk could be a very good fit as an Iron Master who really doesn't want to be a Werewolf and has a serious problem with Kuruth. Of all people, Doctor Strange may fit as a Werewolf if you don't make him a Mage, since his shtick as Sorcerer Supreme tends to be maintaining balance between the magical and physical work and banishing nasty spirits and demons.

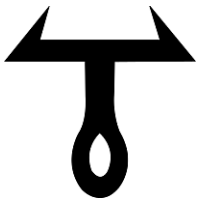

Deadpool is my most obvious pick for a Sin Eater.

I'd actually peg the Hulk as an Anakim Ravager who *really* doesn't like being a Beast.

Deadpool as a Sin-Eater could work, but it's also possible that he's an Abmortal, seeing as the main description for an Abmortal is "immortal serial killer", a bill that Wadey fits pretty well, all told.

Genius: the Transgression 2E is a thing that's being worked on.

Oh easy:

All the Ghost Riders as Sin-Eaters.

Much of their powers comes from the result of some type of vengeful spirit (in the case of Johnny Blaze and Danny Ketch) or a murderous ghost (Robbie Reyes) that come from some form of an Underworld that bonds to the mortal and giving them superpowers and exclusively dealing with supernatural threats.

Hulk could go many ways. If I were ever to do a Darths and Droids style webcomic for the MCU, he'd probably end up as a Demon who burns his cover between the Incredible Hulk and Avengers. I'm pretty sure that he was listed as inspiration for Deviant too. Promethean as well, especially if he tends to smash his way out of problems once Disquiet sets in.

My rational for Deadpool was that the Geist would give Wade someone to talk to and he has legendary healing powers, but Abmortal is cool too.

Given that The Hearse pretty much exists just to play Ghost Rider, I can't believe I biffed on thinking of that.

Lets see, I had Iron-Man as a Destroyer Saboteur demon who used to make occult equivalents to WMDs until he realised where god was sending his technology. His cover is a jerky billionaire, his demonic form is his armour, and he spends a lot of his time making gadgets. Thor was also a demon, though he was a Guardian Integrator.

Kraven could be either a Hero or a Huntsman, Venom could be obviously a Deviant, but how about going for Demon? Would change some things about the character(s), sure, but hey, It's a What if...? after all. Most of the Characters will experience a slight change in tone at least.
Here are some of my takes on it:

Galactus is a Rank 9 Spirit. Let's go with Idigam?
Dr. Doom is a Mage with high Forces and Matter (and high Science, so you might alternatively go Genius), Obrimos imo.
Punisher could be many things: A Hunter, or even a Slasher. Might go Beast, but I wouldn't recommend it. I like him as a Slasher, actually.
Collossus could be a Beast or Deviant. I prefer Beast, which works well if seeing his Metallic mode as spending Satiety on Unbreakable. Deviant ain't out yet, after all ^^"
Antman could be a Genius? Otherwise a Moros with high Life and Matter?
Black Panther is a Hunter in my Books, unique Conspiracy. His superior power comes from training, but also his suit and some sort of (let's call it what it is) coping. Making use of Elixirs made from herbs, so kinda like an Ascending Ones, and having special Relics (Suit, Claws etc.) like Aegis Kai Doru?
Ultron is an Unfleshed Promethean, likely a Centimanus. ALthough Metalfleshed Elemental or Metalfleshed Fairest might work, too.
Black Cat is an Eshmaki Collector, which is why she always returns to her nefarious ways.
Loki is a Demon, what with his several different incarnations, illusions, fighting the boss deity, trying to carve out a kingdom for himself, and preferance for manipulation over brute force.
Scarlet Witch is a Mage, as is Storm. Acanthus with high Prime and Obrimos with Forces and Matter, respectively? Storm might also work as a Beast (Ugallu Nemesis with Storm-Lashed, obviously. Also Wings of the Raptor - She'd be spending a lot of Satiety all the time, though. Mage fits way better)
The Thing is a Tammuz Promethean.
Mystique is a Mirrorskin Darkling.
I like Wolverine and Sabertooth as Werewolves. Hulk could be refluffed into a Werewolf, though I like him as an Anakim who merges with his Horror whenever it get's ravenous ^^"
Johnny Storm is a Fireheart Fairest Changeling, and Groot is a Gargantuan Woodblood Elemental =P By this logic, Rocket Racoon could well be a Maker/Smith Beast Changeling with the Small Frame Merit (Although Wizened with an animalistic Kith like Hunterheart might fit too, on second thought. Prefer the first option, though.)
Drax the Destroyer could be a Beast or an Ogre (prefering the Ogre here), Gamorra is... some sort of Changeling imo, (let's go with Bloodbrute Render Darkling, seems to reflect her past and current abilities well enough) and Star-Lord is a micro-template human Hunter? (No seriously, what is Star Lord in ChroD?)
That would make the Guardians of the Galaxy a mixed troupe of mostly changelings. They fight Thanos and his people a lot, sooo... Thanos the Keeper, Ronin and company Huntsmen?
Daimon Hellstorm is a Lucifuge Hunter.

What's the Silver Surfer?

"Werewolf: the Forsaken 2Ed" gives Idigam "Forge Herald" ability. Now, I'm not saying... But I'm totally saying.

While I have finally acquired WtF 2ed, I still haven't read it yet.
I really, really should.
Thanks for that, it made me chuckle! =D

Could probably fit En Sabah Nur as a high Primal Urge werewolf. He's basically a Pure version of Lycaon-Ur. His ability to forge claimed justifies his Four Horsemen, as well.

I think Rogue would be really hard to do.

Nightcrawler, Changeling Shadowsoul.

Collosus, Changeling Metalflesh Elemental.

Woverine, Sabretooth, Wolf Blooded with a tell that grants regeneration.

Emma Frost Magistos mage.

There was a werewolf power in first edition that allowed them to steal the gifts of other supernaturals. Without eating them. So you could just do that, touching someone gives you a dread power equivalent of their gift, powered by Essence or Willpower.

If Deadpool is a Sin-Eater, does that mean Cable is his Geist?

Ghost Rider could be a Sin-Eater, as previously mentioned. But I can also see him as a Werewolf, with his motorcycle and chains being Fetishes. To keep the flaming skull visual, he could have Fetish Tattoos over his body that give bonus to use fire powers and intimidation when he shifts into Dalu form. Likely an Elodoth or Rahu of the Blood Talons.

I also like the idea of the Hulk as either a Deviant or a Zeka Promethean (Torment = HULK SMASH!).

Bye.

Some more suggestions.

Red Skull would be a Deviant, or an evil Changeling, I think.
General Ross is a Hero, obsessed with The Hulk. At least, if you do not consider the Red Hulk Version, and make Hulk a Beast. Otherwise, he is a hyper-focused Hunter.
Doctor Octopus is a Maker Wizened Changeling, or a Genius.
Dormammu is a Spirit, Rank 9, as is the Phoenix Force.
Bullseye is a Slasher.
Juggernaut is a Tammuz Titan? Could be emulated to a degee by an Anakim Ravager with Titanic Blow and Advanced Giant.
Sentinels are Metalflesh Huntsmen, or Pandorans? Prefer the former, since many X-Men come up Changelings for me.
Sebastian Shaw is an Obrimos Mage going at it on his own.
Professor X is a high-Mind Mage with some Space, so probably a (very affable and optimistic) Mastigos, or an Obrimos with a Legacy that helps with Mind. Also, Cerebro is an Artifact.
Enchantress is obviously a Mage, but could also be some sort of Changeling I suppose.
Dracula is a Vampire (duh), as is Hannibal King, who is most likely a High Humanity Gangrel. Blade is a Dhampir?
Maestro could be an Incarnate.
Surtur is a Changeling, Fireheart Ogre I suppose.
Lizard is a Coldscale Beast, or a Were-reptile. Alternatively, a unique Claimed?
Collector is most obviously a Collector Beast (Either Anakim or Makara), but could also be a Mysterium Mage.
Sandman is a Sandharrowed Elemental, and Electro is also an Elemental.
Thanos is either a True Fae or a High-Ranking Spirit. (True Fae would gel well with Gamora being a Changeling)
Morbius is a Leechfinger Darkling (because I think that is both more fitting and interesting than going with just Vampire, although that could work with an appropriate Bloodline/Discipline, of course).

Namor is some sort of Aquatic Changeling.
Hit Monkey is a Beast Changeling.
Squirrel Girl is ... a Rank 10 Spirit of Squirrels. Yes, you got that right. Not a Beast Changeling, but the most powerful category of spirits. Only this is capable of reflecting the awesome power that is calling and commanding squirrels.
