Oh god, an Abyssal version if a living vice? In other words, a vice that doesn't exist within our reality... I don't even want to know.

This is going to be so great.

A Vice that encourages you to split into multiple personalities?

Huh. So, what would abyssal ghosts be, I wonder? Or abyssal strix?

> *This is why there's no Supernal or Familiars in the 2e core, by the way, because the Familiar bond is a Manifestation on the ephemeral entity's end. We'd have to come up with a seperate set of familiar rules for them, which we don't have room to do.*

Glad to hear that the supernal beings exist in the core,at least. Yay!

Mages can investigate it with Space spells. Some Space spells can cause it.*

Tis why I said "realm" in quotes. I just think its something that would resonate with the Obrimos more in terms of exploration - its been a complaint in my games in the past, that Obrimos get left out when it comes to unique things to explore. But then, I don't exactly pretend to use the default mage game's cosmology- I'm free with tweaking things.

>
> *In second edition, a Geist is a Rank 4 or 5 ghost, while a Kerberos is a Rank 6+ ghost. Awakening 2nd ed will be your first look at what ghosts higher than Rank 2 look like (they have their own set of Rank names, like spirits have gaffling, jaggling, etc).*

> *Though, if the second edition ball keeps rolling, it won't be your last look at them!*

That is pretty awesome to know! Looking forwards to seeing more!

What if they *merge?* Imagine it: Lucifuge as the children of the Abyss, walking shards of a realm of non-existence... How's that for Things That Should Not Be. The Golmoth and Acamoth have *kids*.

Related to the above, I've been running things where the Abyss was the Supernal Reflection of the Lower Depths for a while now, and its pretty awesome. Especially when you start tainting Supernal Summons. Can you imagine an Abyssal Cherubim and Seraphim?

> *Awakening 2nd ed does not mention angels or the God-Machine at all. It gives rules for three kinds of ephemeral entities: spirits, ghosts, and goetics (the beings you find in the astral). It also gives rules for Supernal entities, which share many rules with ephemeral entities (like core stats) but not all (they aren't made of epherema, don't have influences, don't have manifestations, have Arcanum ratings, use mana instead of Essence and aren't affected by powers that affect ephemeral beings). Abyssal entities are a template that goes over any creature type of your choice - Gulmoth are abyssal spirits, Acamoth are abyssal goetics.*

Thanks for the info, although I do hope that supernal familiars return in upcoming Mage supplements.

However, for those who do want to incorporate the God Machine into their Mage

chronicles (even just the core book info without reference to Demon), what 2e Arcana will be necessary to affect Angels?

Don't know. Don't care. I'll think about crossover mechanics if and when I have to.

If it will suffice... it's from the stop-gap mechanics though

> *Originally posted by **Dave Brookshaw***

> *Targeting an Angel, its Numina, rewriting the Pattern of someone claimed, etc, requires equal parts Prime and Spirit. Angels cannot be summoned. You can try to force one to act in a certain way, but angels are inflexible - if carrying out your wishes conflicts with carrying out the God-Machine's wishes, the Angel's programming wins and the spell has no effect.*
>
> *Or, put another way, God has rolled more successes than you on "angel brainwashing". Also, no creating members of another major template (by making angels Fall!) without Archmastery. Bad mages, go to back of class*
>
> *Similarly, Supernal magic can create or manipulate resonance and anchors (and there are several spells in the line to do both already), but can't sense or manipulate Infrastructure at all.*
>
> *Enhancing Abjuration is a Death 3 Prime 3 spell that adds successes to*

a mage's abjuration dice pools.

If you have the correct Bane already, magically creating a warding rather than going through with the Presence + Occult roll is a Space 3, Spirit 2 spell.

Historian ~ **www.cronistasdastrevasbr.com**

I currently ST a... MtAW 2e campaign called "Axis Mundi - Si Vis Pacem"

Since when are core WoD blue books crossover?

We don't have room to detail how Changing Breeds, Inferno demons, or Blood Bathers look under Mage Sight either.

(EDIT - You're mistaking "angels were in the GMC update!" for "Angels are core" for "all the games must account for angels". Only **Demon** has to account for angels, and only then because it uses them as antagonists. **Mage** doesn't use the God-Machine as a setting element, so angels are not required. **Werewolf** deals with spirits, so it includes spirits, but not ghosts or angels. **Promethean** has a lineage that deals with ephemeral beings, so it includes ghosts and spirits, but not angels. It's a matter of space conservation.

Saying you don't have room to deal with it is one thing, but saying that they're automatically crossover? Its a bit strange to me. It feels like you're saying that the Armory books are crossover material as well. Or Book of Spirits and Book of the Dead.

The Shadow and Underworld are part of **Mage**'s setting, though, and have been since the first core. The God-Machine isn't. It *can* be if you want to use it, but the game assumes that when you say "angel" you mean "A supernal being from the Aether".

Likewise ghosts, spritis and angels don't seem to do much in Beast so hopefully that section will either focus on goetics or simply be reused to expand on other game themes. Not every game has to represent every part of the world of darkness just like every other game.

Though, it sounds like Angels are also going to be in the WoD 2e core book as well.

Going by Willow now, or Wil for short. She/Her/Hers.

The Abyssal Template, I assume it has limitations on what you can stick it on, you can't stick it on human, vampires, changelings, Angels, Dominions, Prometheans, Quashillams, Strix, or Supernal Entities for example right? Or can you, after all a Abyssal Entity could claim a human host for example.

And how does a Werewolf deal with running into a Gulmoth in the Shadow?

I don't see why you couldn't stick it on those things. The Abyss is a place of things that should not and cannot be, so impossible versions of just about everything should be in there somewhere.

The Abyssal Ghost would be the Ghost of someone who never existed.

Example an Mage changes the fate of two people for some random well intentioned reason, but they don't hook up like they were originally fated to, the child they would have had, isn't even concieved, never mind born.

This draws the Abyssal Ghost who the Child would have grown up to be from the Abyss, bitter and hateful towards reality and Mages in particular for righting her out of existance, and half mad from being in the Abyss.

Just an idea. Ghosts of People who never existed.
