Akhenaten's reign

- An Awakened pharaoh (likely a prelate), opposing the 'darshana' that would be the Sliver Ladder.
- The Cult of Set Hunter mystery cult choosing to became the Hollow Mekhet in order to avoid the punishment of worshiping something not Aten.
- (No confirmation that the splitting the soul apart may have been an attempt to survive the transformation into Hollow Ones, which have been mentioned in the descriptions of the time)
- This puts more pressure on their allies/rivals, the Cult of Ascending Pheonix, leading to a falling out.

The above is all the currently official stuff. Note the absence of Mummy the Curse (who would most certainly been affected).

Thoughts ripple out, birthing others

Ah yes, that is an awesome era! I'm pr try sure Hawara covers it too, so we may be getting new details in DE2. What book does the Mage tie in come from? I must have missed that.

Mostly the Silver Ladder and Giardians order books but they do put nods to them in other places. They even refer to Akhenaten as a Seer of the Throne at one point.

1. **Werewolf/Hunter: Baltic Crusades** - During the 13th Century, Crusading Knights begin campaigns to Christianize the Pagans of Livonia and Prussia. The old Gods still hold sway in these lands of brooding forests and haunting swamps, But as the Knights encroach, erecting imposing Castles and establishing powerful Holy Orders in their wake the Pagan inhabitants may be forced to embrace the Holy word of Christ or be put to the sword. The Religious upheaval wrecks havoc in the Spirit world and the Uratha, who have grown used to the old ways of the Pagans, find themselves having to respond, but will they do be swept away by the tides of Christendom. With the Crusaders also come elements of the Church who fight enemies other than Pagans, they know the heathen lands play host to all manner of unholy seed, and intend to see it cleansed, but are liable to butt-heads with other hunters, particularly their equally zealous counterparts from the Orthodox Christian domains.
2. **Inferno: Early Protestant Reformation** - After nailing his 95 Theses to a church door in Wittenberg Martin Luther ignited a bloody storm that engulfed Christendom for centuries to come. The Reformation shakes the Church to its foundations as whole nations abandon Catholic doctrine in favour of Luther's teachings. The Holy Bible is translated from Latin to common languages, graft and corruption within the Church is challenged and the printing press is used to spread new ideas across Europe. But the Reformation has a far darker side: the split in the Church creates untold hatred between Christians: Protestants accuse the Pope of being the living Anti-Christ on Earth, the Catholic views the Protestants as heretics in league with the Devil. Indeed, Luther himself claims that the Devil torments him, makes him doubt. Orgies of religious violence become common as Europe is ravaged by peasants wars and persecution as both sides see the hand of Satan behind the other. But maybe it is not all mere paranoia: maybe there is something else, a dark voice in the ear of the Bishop, telling him that if he simply burned enough heretics, the blasphemy will stop, or murmuring to the freshly converted Prince that violently seizing the Church lands (and the riches held within) would be a good way to fill the state coffers.
3. **Werewolf: French and Indian War** - It is the height of the 18th century, the Age of Enlightenment, and yet the Civilised world is in the grip of war. The Great Powers of Europe are at each other's throats, and the conflict has inevitably shifted to their colonies. In the still largely unexplored

continent of North America Great Britain and the Kingdom of France vie for the Allegiance of the Native people in a war to gain control of the other nations colonies. The colonists, who increasingly feel separate from their European brothers, are also called-up as militia. The Forsaken, at home among the vast forests, are forced to either take sides or try to remain neutral, especially when the pure tribes, having infiltrated the European armies, seek to use the carnage as cover to wipe out the Forsaken of the New World. Many Uratha find themselves travelling with raiding native war-parties, or defending besieged forts in the wilderness, all the while their comrades, both white and indian, have no idea of their true nature, until the situation becomes dire enough to assume the Gauru form.

4. **Vampire/Hunter: Prohibition era New York/Chicago** - It seemed like a good idea at the time, during the 1920s a combination of pressure from moralistic protestants and social progressives, combined with broad, bi-partisan consensus, results in a nationwide ban on alcohol. Despite the best intentions of the activists, organised crime syndicates in America's major cities gain control over the trade of booze. Communities are made less safe, while powerful gangsters become richer. It is a time of widespread corruption, backroom deals, mob hits and assassinations, crusading public servants and honest vs. crooked cops. But while the average Joe would kill for his next spirit, there are others who are never short of ways to slake their own thirst, and in an environment where social order has given way to omnipresent crime and corruption, find it that much easier to hunt. They mingle among the criminal-ruling class created by the illegal alcohol trade, while preying on the desperate souls who only want a drink of their own. Then there are those who fight back. Those decent citizens who prey on the parasites that stalk the streets of America's still-growing cities. Those who understand that the Al Capone's of the world are not the only ones who need to be "nailed".

Thoughts?

Mix in some Inferno - or at least Lucifuge - with the phrase "a demon in every bottle" turning out not to be a metaphor.

I don't know if it went for Capone, but there are many in the Mob who a religious to a degree well at odds with their profession - and also weirdly patriotic. They could form unlikely allies for several hunter groups, or even a compact of their own. Not least because vampires would love speakeasies: a ready supply of drunk people who'll be reluctant to even say where they were, let alone that they were attacked.

That's actually a good idea, you could even have a whole new compact of hunters within the Italian mob. Maybe a bunch of grunts who worked for a boss who got assassinated by a Vampire.

I don't see Vampire in the Soviet-Afghan War. Demons, however, that I can see.

I don't think Werewolf + Demon has been done before, either.

I for one, am startled that no one has suggested the French Revolution. A societal upheaval, heavy on symbolism, that birthed many new ideologies, all through overthrowing a wealthy asshole-ish formerly all powerful ruling class? I can definitely see Nameless Order mages putting their foot down and refusing to allow the Silver Ladder, all the while the Freeholds of France start to realize analogies to their own Durance in the working class beneath the Monarchy. Bonus points for featuring many different political clubs, which could correspond to any of the Nameless Orders that were the only non-Diamond thing mages could belong to.

Oh, French Revolution has been suggested many, many times. So many times it is Vampire/Mummy/Demon era in DE2. When it originally showed up in the DE1 Kickstarter polls, it was a Mage/Mummy era though. Mage/Changeling/Beast would be a very interesting alternative take, especially since all three deal with dreams.

Hunters would certainly be a factor as they seek out the monsters repressing them under the cover of the aristocracy.

And Werewolves would be interested in the disruption to power dynamics that overthrowing the old rule would foster. (Would Revolution Spirits s disrupt the local Spirit Courts? At least until they establish a new hierarchy, same as the old one...)

Honestly, what Game-line doesn't fit?
